## Cyclic redundancy check Wikipedia

January 10th, 2019 - A cyclic redundancy check CRC is an error detecting code commonly used in digital networks and storage devices to detect accidental changes to raw data

## Mathematics of cyclic redundancy checks Wikipedia

January 11th, 2019 - The cyclic redundancy check CRC is based on division in the ring of polynomials over the finite field  $GF(2)$  the integers modulo 2 that is the set of polynomials

## 32 Bit Cyclic Redundancy Codes For Internet Applications Wikipedia

January 11th, 2019 - 32 Bit Cyclic Redundancy Codes For Internet Applications is a book that provides a comprehensive overview of the theory and applications of cyclic redundancy codes. The book covers the fundamentals of CRC codes, including their mathematical properties and practical implementations. It also discusses various applications of CRC codes in digital communications and data storage systems. The book is suitable for students and professionals alike who are interested in error detection and correction techniques.

## Portable Network Graphics PNG Specification Second Edition

November 9th, 2003 - This document describes PNG Portable Network Graphics an extensible file format for the lossless portable well compressed storage of raster images

January 11th, 2019 - CRC cyclic redundancy check is a type of error-detecting code. It is a simple and efficient way to check for errors in data transmission or storage. The CRC code is calculated by dividing the data by a fixed polynomial. The remainder of the division is the CRC code. The CRC code is then transmitted or stored along with the data. The receiver or reader can then calculate the CRC code for the received or read data and compare it to the CRC code that was transmitted or stored. If the two codes are the same, the data is assumed to be correct. If the two codes are different, an error is assumed to have occurred.
